

**Remarks**

The specification has been amended to insert United States Patent and Trademark Office recommended headings and subheadings. The position of the description of the Figures has been changed to a position following the Abstract. The claims have been rewritten to place them into U.S. format and to eliminate multiple dependent claims. An Abstract has been added. None of the amendments raises any issue of new matter.

Early favorable consideration is respectfully requested. It is noted that the ISA has indicated that the claims fully meet the PCT requirements of novelty, inventive step, and industrial utility.

Respectfully submitted,

**Volker Stanjek et al.**
